CCF offer a complete service to the specialist interiors industry involved in ceilings, drywall, screeding, insulation, partitioning and fire protection. We hold massive stocks of one of the best core product ranges in the industry, at prices which are competitive. And because of our large stock holdings, you can rely on CCF to deliver on time, in full, every time.

Our entire product range is backed by specialist staff who are committed to giving you the best possible service and putting you first. Above all we're dedicated to delivering on our commitments and keeping promises at all times.

- **A core product range that can be supplied from stock**
- **Deliveries on time and in full**
- **Staff who understand and always put you first**
- **Service you can trust and advice you can rely on**
- **Competitive pricing**

Ceilings

A comprehensive range of mineral, metal and plaster tiles, grid systems and accessories from major manufacturers.

Drywall

A complete range of dry lining products available nationally from the UK's leading distributor.

Screeding

Nationwide distribution of a broad but specialist product range coupled with in-house technical expertise is now available to all CCF customers.

Insulation

A range of specialist insulation branches with huge stocks and fast, reliable delivery.

Partitioning

A versatile range providing attractive, economical solutions with acoustic and fire performance where required.

Fire Protection

Fire protection and fire barrier products from leading manufacturers and a range of metal products, fixings and access panels.

TREETEX RANGE GUIDE

Treetex is one of the most established brands in the business with over 75 years experience of providing ceiling solutions to UK contractors. Now with a new extended range, Treetex can provide installers with an even more comprehensive choice of suspended ceiling solutions.

The range now includes tiles, grid, modular lighting and access panels together with fixings and accessories for virtually every modular exposed grid ceiling installation. With the addition of three new performance tiles, the Treetex range can now provide enhanced levels of fire resistance, humidity resistance and sound attenuation.

Where appropriate, our products have been tested or assessed by independent accredited laboratories and meet the relevant British Standards. This means that installers can be confident that Treetex products are of the highest quality and will perform exactly as required.

MINERAL FIBRE CEILING TILES

The Treetex tile range comprises three general purpose tiles and three tiles offering specific technical solutions. These are available in various module sizes, face patterns and edge details.

The entry level general purpose tile is **Spintone**. **Sahara** offers mid range performance whilst **Superior** provides solutions for more demanding general purpose applications.

Where a specific technical performance is required, Treetex offers **Mezzanine FR** for fire rated ceiling solutions, **Acoustimax dB** for sound attenuation and acoustical control and **Aquamax RH** for applications where high humidity resistance is required.

In fire performance applications always refer to the Treetex Tile and Grid Fire Resistance data sheet. For general technical information there are also separate data sheets available for each tile. Please contact your local branch of CCF to pick up a copy or download from www.ccfltd.co.uk.

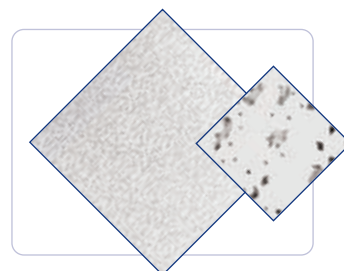

MINERAL FIBRE CEILING TILES

TREETEX – SPINTONE 180 & 360

Modular Lighting

For a range of easy to install, off the shelf recessed modular luminaires and other lighting accessories see pages 24-27

Cavity Fire Barriers

For a range of cavity fire barrier solutions for installation behind suspended ceilings see pages 20-23

Fire Canopies for Lights

For a range of Fire Canopies required to maintain the integrity of a fire protective ceiling membrane see page 29

Plywood Yokes

For accommodation of downlighters or surface mounted lighting or other services see our range of Lighting Yokes on page 26

Ventilation/Natural Light

For air pressure dissipation and natural light solutions see Egg Crate Panel options on page 28

TX24 SUSPENSION GRID

To complement the Treetex tile range, TX24 grid is the ideal choice. Treetex TX24 grid is a 24mm wide exposed grid system and is compatible with most industry standard modular lay in ceiling tiles. There is a technical data sheet available to help with installation and grid loadings. When used with the appropriate Treetex tile, the ceiling solution will exceed the one hour requirement for fire protection to steel beams, timber floors and mezzanine floors. In fire resistance applications, always refer to the Treetex Fire resistance technical data sheets for the correct tile and grid choice and installation methods. Treetex ceiling systems have been independently tested and provide compliance with the appropriate fire test authority. Other grid sizes and trims are also available from CCF.

The TX24 technical data sheet is shown below. For your copy, please contact your local branch of CCF or download at www.ccf ltd.co.uk.

CONCEALED GRID SYSTEMS

MF Ceiling System

Concealed Grid Ceiling Systems

Whatever your need in concealed grid or MF Ceiling Systems, Treetex can provide the solution. The concealed grid system is designed to support mineral fibre concealed ceiling tiles.

Benefits

- All sections available ex-stock
- Accessories available
- Formed from pre-galvanised mild steel
- Easy to cut and form
- Quick and easy to assemble on site
- Easy to cut to length using tin strips

CONCEALED GRID SYSTEMS

The MF suspended system ceilings are ideal for commercial and domestic applications, where services are to be accommodated and when upgrading and protecting existing structures. Ceiling height may be varied to accommodate services or ducting, etc. providing a high performance ceiling with sound insulation and fire protection.

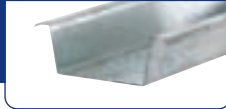

They are compatible with partitioning systems and suitable for direct decoration or textured finish. Always suspend heavy loads, air ducting, lighting units, etc. directly from structural soffit to avoid loading of the suspension framing and always alienate connecting clips on primary channels.

Benefits

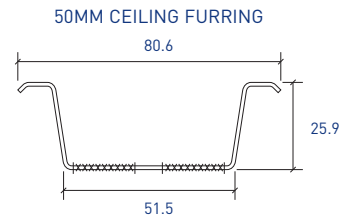

- Mineral wool can be incorporated for thermal or acoustic insulation
- Creates a seamless surface suitable to receive most decorative finishes
- Fits easily together
- Suitable for fixing all types of plasterboard
- Creates void above the ceiling for services
- Improved acoustic performances can be achieved by using Acoustic Hangers (see page 19)
- Access to ceiling void can be achieved using Ceiling Access Panels (see page 38 and 39)

FIRE BARRIER SOLUTIONS

Isolating compartments within a ceiling void is an essential part of controlling the spread of fire. In addition to traditional rockwool, wire faced barriers, CCF provide exclusive distribution of Firefly Fire Barrier Systems and accessories, generally accepted as providing a cleaner, lightweight and easy solution to barrier provision.

MODULAR LIGHTING SOLUTIONS

The Combi 4 lamp fitting complete with aluminium louvre has long been a popular choice for modular lighting, but the Treetex lighting range does not stop there. High frequency and emergency fittings are also available in three and four lamp options. Treetex also offer a wide choice of surface mount, emergency exit signage, designer and linear lighting solutions for all internal applications. High and low bay units for warehouse use and yard lighting is also available. CCF can also help with lighting schemes to meet all of your requirements.

ALUMINIUM PERIMETER TRIMS AND TRANSITION PROFILES

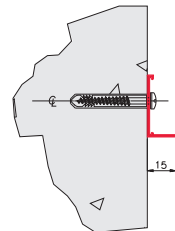

Joining different materials at ceiling junctions can be a problem e.g. mineral fibre tiles in exposed grid systems to MF plasterboard system. To help overcome this CCF offer a range of aluminium profiles to join most types of materials used in ceiling applications.

ALUMINIUM PERIMETER TRIMS AND TRANSITION PROFILES

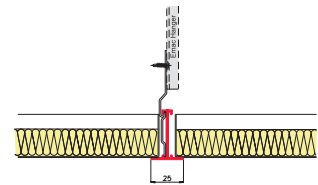

ALUMINIUM PERIMETER TRIM PROFILES

PRODUCT CODE	PRODUCT DESCRIPTION
545553	TCA0101 PERIMETER TRIM 3000mm
545334	TCA0108 PERIMETER CHANNEL 20 x 38 x 3000mm
545791	TCA0110 ODDLEG TRIM 20 x 60 x 3000mm
545963	TCA0124 SHADOWGAP CHANNEL 20 x 15 x 15 x 45 x 3000mm
545447	TCA0128 90DEG SHADOWGAP CHANNEL 20 x 20 x 20 x 40 x 3000mm

LASER LEVELS AND TEMPORARY SURFACE PROTECTION

For an accurate level when beginning installations, you need a quality laser level. CCF offer a range of high quality Topcon interior laser levels to suit most budgets and applications. We can also help with repairs and servicing, particularly on the more complex laser models. Other laser levels available on request.

TOPCON LASER LEVELS

PRODUCT CODE	PRODUCT DESCRIPTION
160082	RLVH4G ROTATING GREEN BEAM LASER LEVEL
548621	RLVH3D ROTATING RED BEAM LASER LEVEL
160094	PLS180 CROSS BEAM LASER LEVEL

Temporary protective sheeting is a standard product to CCF but in addition we can supply a variety of products to help protect surfaces during building refurbishments.

TEMPORARY POLYTHENE PROTECTIVE SHEET

PRODUCT CODE	PRODUCT DESCRIPTION
780941	TEMPORARY POLYTHENE PROTECTIVE SHEET 4 x 50,000mm 8kg MEDIUM DUTY

ACOUSTIC INSULATION PADS FOR METAL TILE SYSTEMS

Perforated metal tiles often require insulation to help achieve the desired acoustic performance. A range of sizes and densities are available from the Treetex range.

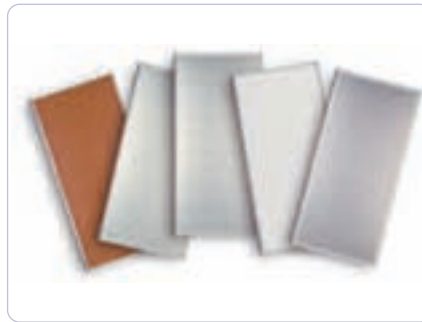

INSULATION PADS BLACK

PRODUCT CODE	PRODUCT DESCRIPTION
547965	INSULATION PADS BLACK POLYTHENE 600 x 600 x 60mm
548026	INSULATION PADS BLACK POLYTHENE 600 x 600 x 100mm
548050	INSULATION PADS BLACK POLYTHENE 600 x 600 x 150mm
548086	INSULATION PADS BLACK POLYTHENE 600 x 600 x 200mm
492140	INSULATION PADS BLACK POLYTHENE R/W 600 x 600 x 25mm
548209	INSULATION PADS BLACK POLYTHENE R/W 600 x 600 x 30mm 45kg
548239	INSULATION PADS BLACK POLYTHENE R/W 600 x 600 x 50mm 45kg
548296	INSULATION PADS BLACK POLYTHENE R/W 600 x 600 x 100mm 23kg
548371	INSULATION PADS BLACK POLYTHENE 1200 x 600 x 150mm
545851	INSULATION PADS BLACK POLYTHENE 1200 x 600 x 100mm

OTHER CREATIVE CEILING SOLUTIONS FROM CCF

CCF can also help provide solutions for the more unusual project. These include mirror ceiling panels, translucent ceiling thermal panels, curved ceiling solutions – both at perimeter and in ceiling plane, column casings and ceiling and wall acoustic baffles. For those that want to get their advertising message or company logo onto their ceiling we can even supply printed ceiling panels. If you don't see what you want, just ask at your local CCF branch. We want to help you find solutions for all of your interior build requirements.

- **Mirror ceiling panels**
- **Translucent thermal panels**
- **Curved ceiling solution**
- **Column casings**
- **Ceiling and wall acoustic absorbers**
- **Printed ceiling panels**
